C:\Users\Ash\Videos>type priti.txt
What is Lorem Ipsum?
Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

PS C:\Users\Ash\videos> |
```

10.Copy a File or Directory.

11. Switch to Root User.

```
PS C:\Users\Ash\videos> runas /Ash:Administrator "cmd.exe"
RUNAS  USAGE:

RUNAS [ [/noprofile | /profile] [/env] [/savecred | /netonly] ]
      /user:<UserName> program

RUNAS [ [/noprofile | /profile] [/env] [/savecred] ]
      /smartcard [/user:<UserName>] program

RUNAS [ [/machine:<MachineType>] ] /trustlevel:<TrustLevel> program

      /noprofile      specifies that the user's profile should not be loaded.
                      This causes the application to load more quickly, but
                      can cause some applications to malfunction.
      /profile        specifies that the user's profile should be loaded.
                      This is the default.
      /env            to use current environment instead of user's.
      /netonly        use if the credentials specified are for remote
                      access only.
      /savecred       to use credentials previously saved by the user.
      /smartcard      use if the credentials are to be supplied from a
                      smartcard.
      /user           <UserName> should be in form USER@DOMAIN or DOMAIN\USER
      /showtrustlevels displays the trust levels that can be used as arguments
                      to /trustlevel.
      /trustlevel     <Level> should be one of levels enumerated
                      in /showtrustlevels.
      /machine        specifies the machine architecture of the process.
                      <MachineType> should be one of x86|amd64|arm|arm64.
      program         command line for EXE. See below for examples

Examples:
> runas /noprofile /user:mymachine\administrator cmd
> runas /profile /env /user:mydomain\admin "mmc %windir%\system32\dsa.msc"
> runas /env /user:user@domain.microsoft.com "notepad \"my file.txt\""

NOTE: Enter user's password only when prompted.
NOTE: /profile is not compatible with /netonly.
NOTE: /savecred is not compatible with /smartcard.
